## DO YOU FEEL LOST?

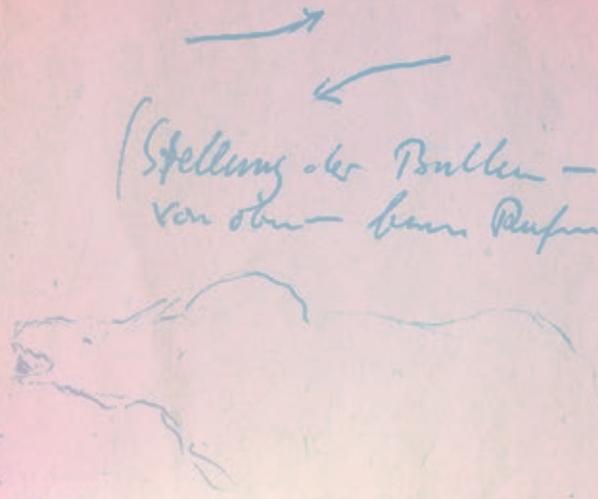

Do you long for a connection with other species? Do you find yourself doubting your own humanity despite doing everything this world demands of you? Or perhaps you are just bored and tired of speaking the same old words over and over, without ever really expressing the core essence of your own being.

We believe that every voice has a unique and powerful purpose. In fact, it is your birthright to make a joyful noise and share it with the world!

## WE, HUMANS, ARE FACING AN EXISTENTIAL CRISIS

For too long, we have tried to define our own humanity based on distinction from other animals, making us an isolated and lonely species. We fear that sounding like animals will make us less human, and thus we limit our voices only to perform words and nothing but words.

As we learn to speak as babies, we imitate the sounds of our parents. We do this because we were born with a desire to connect and we instinctly understand that imitating is a way of understanding another being. As we grow up, we need community, friends and family. We can not exclude animals because we, as humans, need connection with other species.

## COMING OUT

Perhaps you are shy, practicing your animal sound in solitude. We ask you to join us, to be part of something bigger! Perhaps you have never taken your talent seriously. It is time to come out of your closet and be part of something bigger! We will take it seriously! WE WANT TO HEAR YOU!!

We highly encourage you to record your own animal sound imitation and send it to us so that we can save it forever in our archive of human and animal voices.
